CATALDO AMBULANCE OPERATIONS CENTER

When Cataldo Ambulance decided to relocate their Operations Center, they wanted something iconic to distinguish themselves as a state-of-the-art medical transportation provider. Additionally, they needed space that would allow for the company to grow in size and technological capabilities.
The new 12,000 sf building is home to executive offices, a communications center, and a host of service delivery vehicles. The facility also serves as the new home of the EMS Training Center with a fully equipped simulation lab and additional space to accommodate the growing number of medical personnel. As the site was formerly a car dealership, an existing garage was kept intact and rehabbed for ambulances. ■

LOCATION

Malden, MA
